## Session Goal

- ❑ To illustrate the use of video conferencing technology in an immersion setting.
- ❑ To discuss how bilingual students have contributed and could contribute to the development of Latin American communities.

### *Global Classrooms*

Are windows into the world...

Students have an opportunity to connect with children and resources in the world to expand the boundaries of the classroom, while practicing the language of instruction.

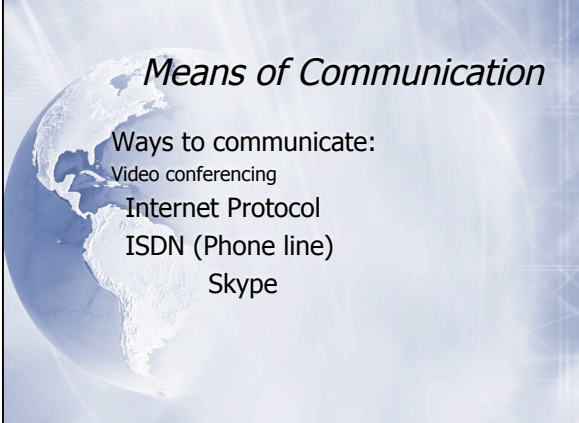

### *How we communicate with the world?*

- Computers and internet
- I-pods
- Cell phones
- Smart boards
- Video conferences

### *Global Classrooms*

They are equipped with video conferencing equipment for students to communicate with people in other places in the world.

### *Means of Communication*

Ways to communicate:

- Video conferencing
- Internet Protocol
- ISDN (Phone line)
- Skype

### *Equipment*

- ❑ Computer with a camera
- ❑ Polycom camera
- ❑ Smart board

### *Polycom Camera*

### *Polycam Equipment*

### *History*

- ❑ 1999- Ordway theater in St. Paul videoconference with Red Lake Reservation in North Minnesota.
- ❑ Program- Sofrito: Cuban Musical

*Videoconference: Peer Mediation Training*

- ▣ Students at a school in St. Paul
- ▣ With students in Montevideo, MN

*Video conference with the London Tower*

Students learned about:  
How to dress a knight  
Jewels of the Crown

*Videoconference with Stonehenge School*

Students learned about  
History of Stonehenge

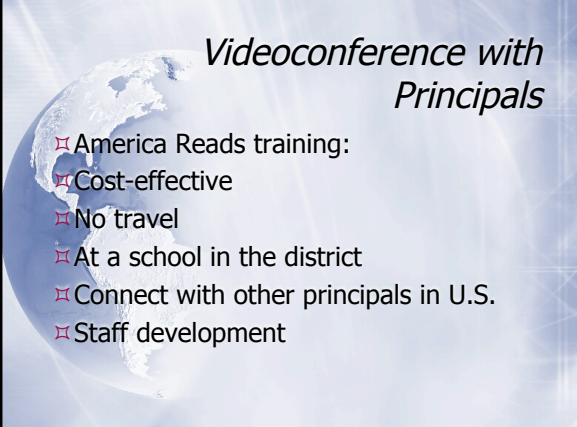

*Video conference with Australia*

Australian Coral reef:

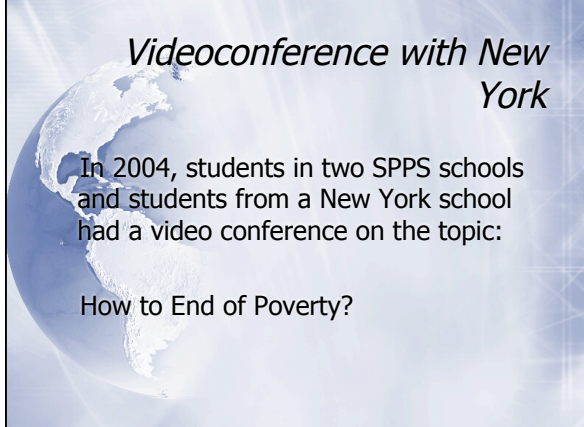

- ▣ Underwater videoconference
- ▣ A diver showed students the underwater sea life: stars, sea cucumber, predators in tank

### *Videoconference with Principals*

- ❑ America Reads training:
- ❑ Cost-effective
- ❑ No travel
- ❑ At a school in the district
- ❑ Connect with other principals in U.S.
- ❑ Staff development

### *Videoconference with New York*

In 2004, students in two SPPS schools and students from a New York school had a video conference on the topic:

How to End of Poverty?

### *Ten areas identified to reduce poverty in Latin America by our students*

1. Clean Water
2. Food
3. Housing
4. Health and Hospitals
5. Education
6. Transportation
7. Jobs and training
8. Technology
9. Infrastructure (roads, bridges)
10. Manufacturing

### *Poverty Classification*

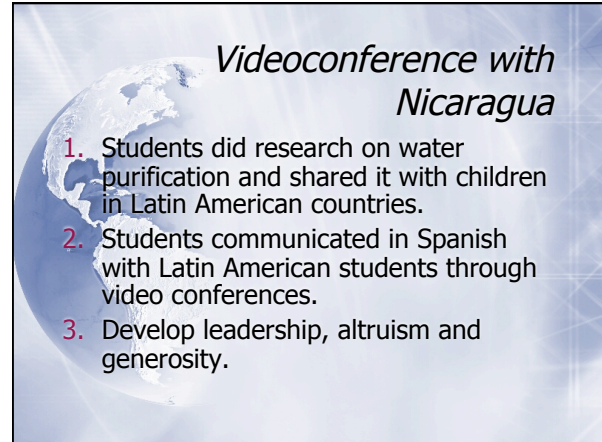

Extreme Poverty:  
When 25% of the population lives below \$1 dollar a day.

Moderate Poverty:  
When 25% of the population lives below \$2 dollars a day.

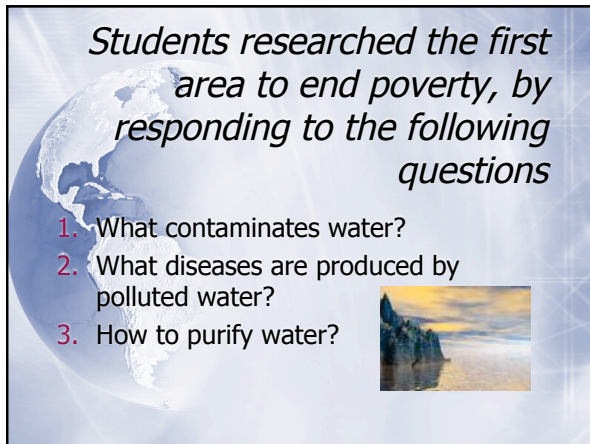

*According to the United Nations Millennium Goals*

The deadline to end poverty:  
2015 Countries with Extreme Poverty (Africa)  
2025 Countries with Moderate Poverty (Latin America)

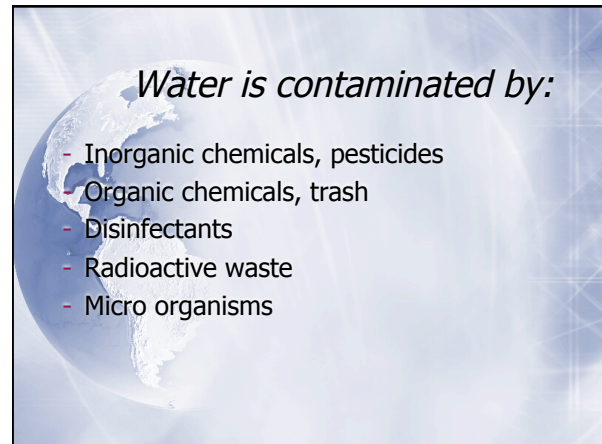

*Videoconference with Nicaragua*

1. Students did research on water purification and shared it with children in Latin American countries.
2. Students communicated in Spanish with Latin American students through video conferences.
3. Develop leadership, altruism and generosity.

*Students researched the first area to end poverty, by responding to the following questions*

1. What contaminates water?
2. What diseases are produced by polluted water?
3. How to purify water?

*Water is contaminated by:*

- Inorganic chemicals, pesticides
- Organic chemicals, trash
- Disinfectants
- Radioactive waste
- Micro organisms

### *How is water contaminated?*

### *What diseases are caused by water pollution?*

1. Cholera (e-choli)
2. Typhoid fever
3. Dysentery
4. Diarrhea, stomach aches (ameba)
5. Learning disabilities (lead)

### *Contaminated water has germs that make us sick*

### *Polluted water*

Kills 5,000 children per day in the world.

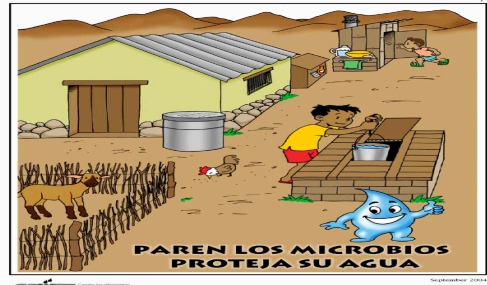

### *How to purify water*

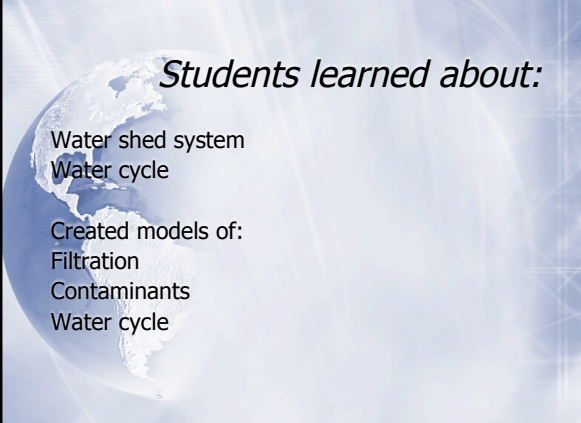

- Prevent littering water
- Boil the water
- Silver filters
- Reverse osmosis
- Water purification plants

### *Protect the water*

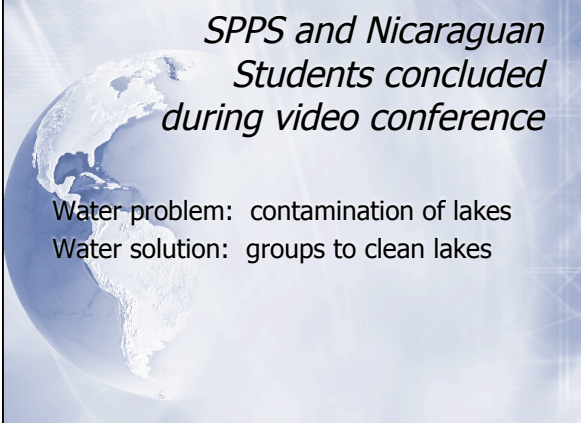

**PAREN LOS MICROBIOS  
PROTEJA SU AGUA**

### *Students learned about:*

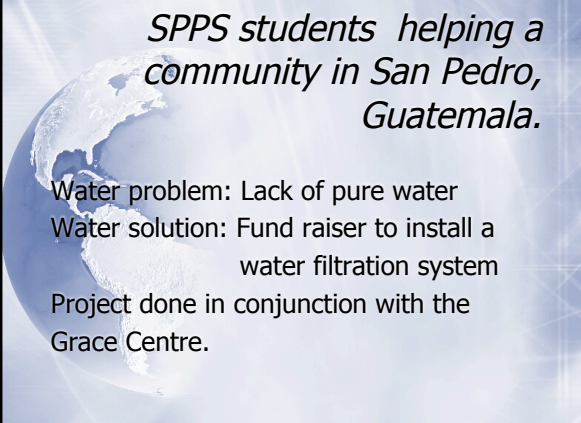

- Water shed system
- Water cycle
- Created models of:
  - Filtration
  - Contaminants
  - Water cycle

### *SPPS and Nicaraguan Students concluded during video conference*

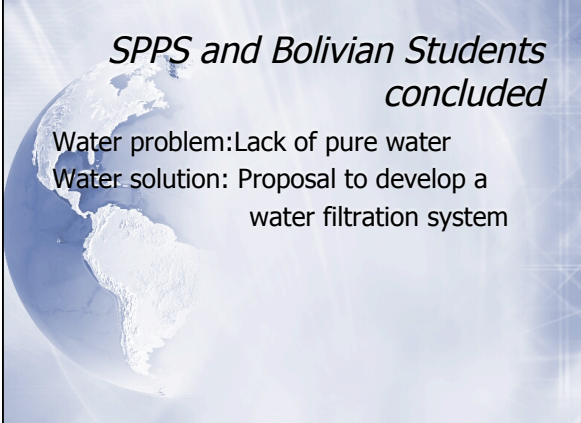

- Water problem: contamination of lakes
- Water solution: groups to clean lakes

*SPPS students helping a community in San Pedro, Guatemala.*

Water problem: Lack of pure water  
Water solution: Fund raiser to install a water filtration system  
Project done in conjunction with the Grace Centre.

*SPPS and Bolivian Students concluded*

Water problem: Lack of pure water  
Water solution: Proposal to develop a water filtration system

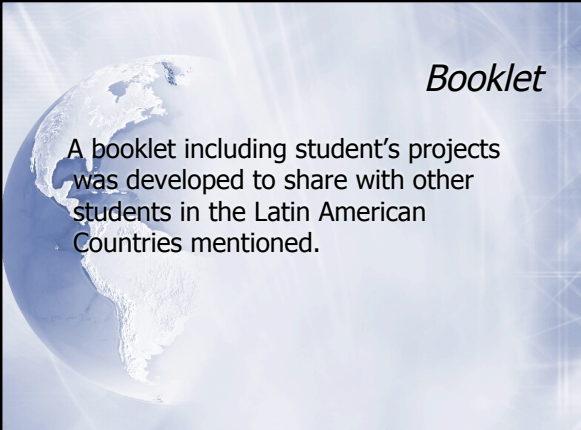

*Engineers without borders*

Presented their water project in Uganda:  
Water wells and sanitation to schools in Masaka, Uganda.

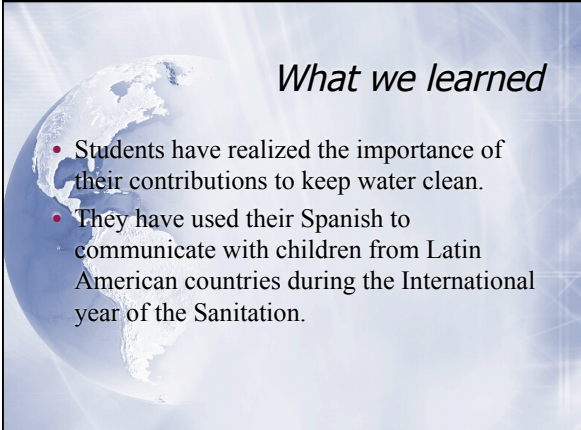

*Brochure*

A brochure was made in Spanish to send to the students and communities in Nicaragua, Guatemala, Dominican Republic, Bolivia, Mexico and Colombia.

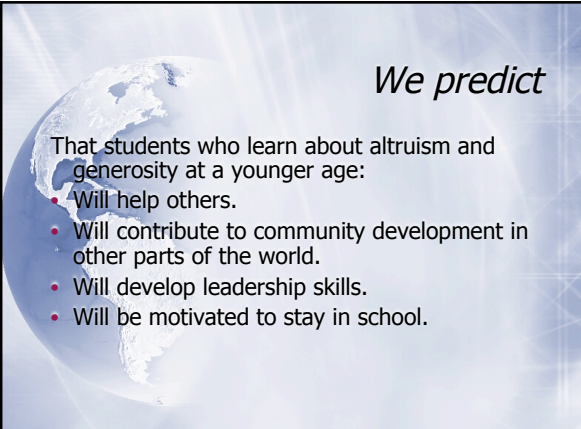

*Booklet*

A booklet including student's projects was developed to share with other students in the Latin American Countries mentioned.

*What we learned*

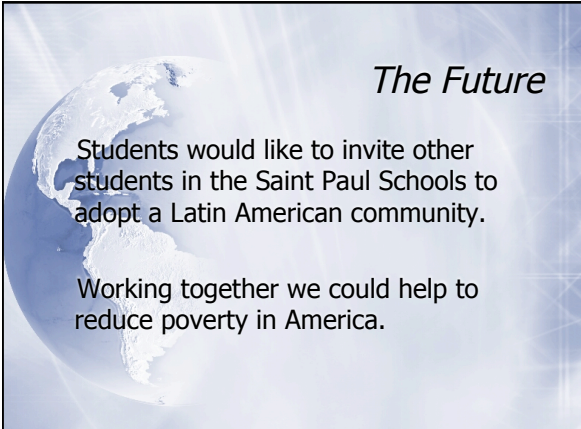

- Students have realized the importance of their contributions to keep water clean.
- They have used their Spanish to communicate with children from Latin American countries during the International year of the Sanitation.

*We predict*

That students who learn about altruism and generosity at a younger age:

- Will help others.
- Will contribute to community development in other parts of the world.
- Will develop leadership skills.
- Will be motivated to stay in school.

*The Future*

Students would like to invite other students in the Saint Paul Schools to adopt a Latin American community.

Working together we could help to reduce poverty in America.

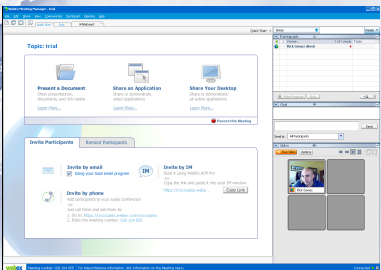

### *Education is*

The best anti-poverty program
